MATERIAL & PRINTING STANDARDS | MAGAZINES

SPECIFICATIONS FOR THE ELECTRONIC DELIVERY OF ADVERTISEMENTS FOR MAGAZINES (HEATSET)

The standards are defined within the context of Medibelplus, the joint project for newspaper and magazine printing in Belgium.

PDF

The advertisement(s) should always be delivered in a Certified PDF, in CMYK, in accordance with the PDF specifications on www.medibelplus.be for magazines.

IMAGE RESOLUTION

Grayscale / CMYK: 300 dpi
Maximale compression: 300%

QR-Code
Resolution: minimum 300 dpi
Format at least: 2,5 cm
Only in Black and White

DIFFERENCES IN FOUR COLORS

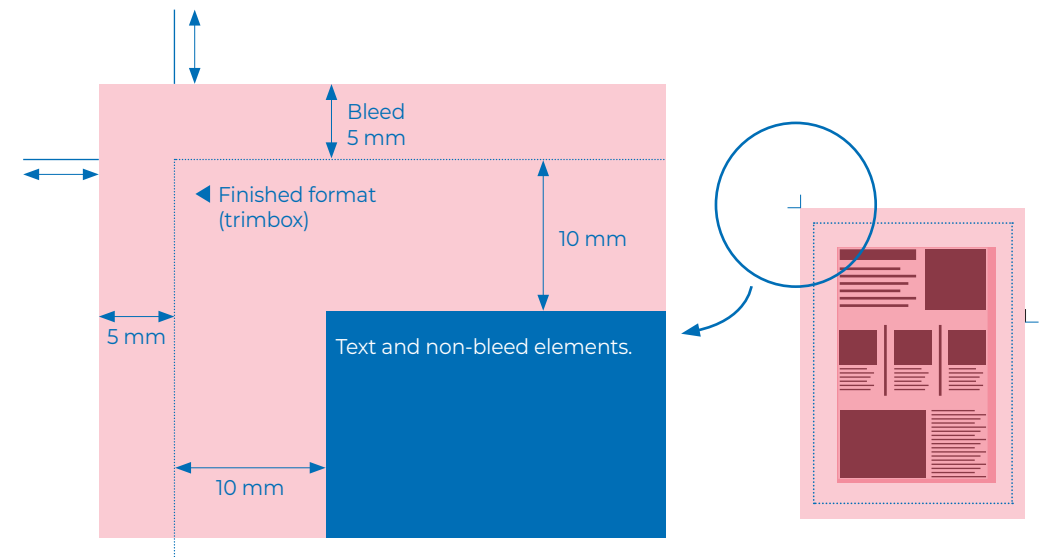

In magazine production, 2 four color pages usually fall within the same ink zone. For this reason, they need to be printed in standardized form, and printing adjustments based on 1 page are not possible.

DO YOU HAVE ANY QUESTIONS?
