2.5+ hours

for multi-device listeners in a given day.

1 in 5

minutes spent on Spotify Free are spent looking at the screen.

Context matters because listeners are more receptive to messaging when it matches their mood or mindset.

75%

of Spotify Free listeners say they remember ads more when the ads recognise their moment or setting.

Product Specifications

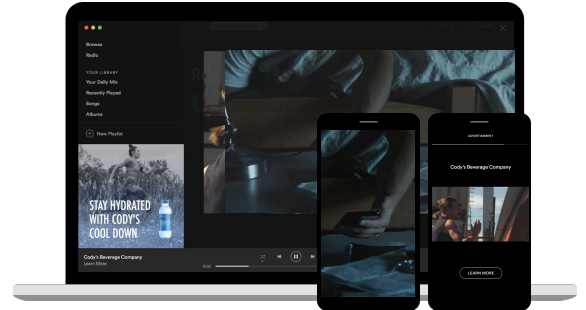

Sponsored Sessions

Be the only commercial message delivered for 30 minutes with Premium brand placement at the start of a listening session.

Video Takeover

Tell your video story with confidence and deliver quality video views across mobile, desktop, and tablet devices.

How it works

Users receive your brand's Sponsored Session offer only if the app is in view, at the start of mobile sessions. After watching your video message, a clickable display unit appears, inviting further engagement and initiating the 30-minutes of uninterrupted listening.

User receives a Video Takeover ad between songs during ad breaks when the Spotify app is **in view**. To drive further engagement, the video unit includes:

- Mobile – clickable CTA button
- Desktop – branded companion banner
