GRAMMAGE AND SIZE

Minimum size (finished product)
210 mm W x 148 mm H

Maximum size (finished product)

- 400 mm W x 275 mm H
- 4 pages: from 200 g/m² (unsatinned)
- 8 pages: from 150 g/m²
- 12 pages and more: from 90 g/m²

Minimum thickness: 1 sheet (2 pages)

Paper weight (indicative):

- Single sheet : from 200 g/m²
- 4 pages : from 100 g/m²
- 8 pages : between 65 and 100 g/m²
- 12-16 pages : between 60 and 80 g/m²
- More than 16 pages : between 45 and 60 g/m²
- Maximum 96 pages

Maximum weight of the total number of inserts per day:

No more than 120 g per edition.

Please contact us if you have a request for a folder larger than 120 g.

RESERVATION DEADLINE

3 weeks before distribution, subject to availability and feasibility.

In the event of cancellation after the closing date, a cancellation fee of 50% of the amount will be charged. When booking, please advise us of the format, number of pages and weight of the insert.

The publisher cannot guarantee sector exclusivity for inserts in the same edition.

WHERE TO DELIVER

Printing Partners Paal-Beringen N.V.

Industrieweg 147

Poort West-Limburg 2206

B-3583 Paal-Beringen

Tel. +32 11 71 71 71

E-mail: dirk.meeus@coldsetprintingpartners.be

WHEN TO DELIVER

- Monday to Friday, between 8:00 am and 4:00 pm.
- Inserts must be delivered to the print company 5 working days before the insert date and no later than 3 working days.
- **Attention:** Exceptional Belgian holiday closure on 21.07 and 11.11.

INSERTS

DELIVERY NOTE

Each delivery of inserts must be accompanied by a delivery note containing at least the following information:

- Name of the customer
- Name and language of the edition concerned
- Name of the insert
- Date of distribution
- Total number of inserts on the pallet
- Number of inserts per package

If you are delivering several versions of your insert for different editions, you must pack and deliver them separately. If the delivery is not made according to the specifications. If the delivery is not made according to the specifications, the additional costs will be charged to the customer.

TECHNICAL APPROVAL

For all other types of inserts, models or mock-ups must systematically be submitted to the print planning manager for approval, at the latest 6 weeks before the publication date at the latest.

The planner must have assess the product to be inserted and determine if it is can be included in the schedule. Before the insert is technically possible. The booking of the insert is only definite when the the production manager of the printing partner has given his approval. The minimum number of layouts to be supplied for a test is 500 copies.

For more information, please contact
print company planning manager:
Jos Castro, 011/71 71 77 - 0475/80 33 42
planningdrukcentrum@coldsetprintingpartners.be

THE FOLLOWING INSERTS CAN BE PROCESSED

SINGLE SHEET	MAGAZINE/BROCHURE	CROSS-FOLD	WRAP-FOLD	MIDDLE FOLD
				

THE FOLLOWING INSERTS BE PROCESSED

HARMONICA FOLD	ALTAR FOLD
	

PACKING HEIGHT	NO PACKAGING	STABLE PALLETS	PROTECTIVE LAYER ON THE PALLETS	PROTECTION LAYER BETWEEN THE PALLET LAYERS	STRAIGHT STACKING
					
• The packing height must be a <u>minimum of 10 cm</u> and a <u>maximum of 16 cm</u>. 1. If a packing of 10 cm does not contain 75 copies, the height of the packing must be adjusted to a maximum of 16 cm. 2. <u>The backs of the printed matter must be on 1 side of the packing</u> • Ensure that all packings in one pallet layer are of the same height. • A top and/or bottom sheet may not be used in the individual packings of printed matter.	• There must be no protective paper at the bottom of the packing. • Do not tie the individual packings together nor wrap them in foil. • A binding tape around the packings could damage the brochures. • Copies may not be packed in boxes that are in turn stacked on a pallet.	• Pallet dimensions 120 x 80 cm (disposable). • The pallets must be able to be handled on all 4 sides with a pallet truck or forklift.	• Place a sturdy sheet of cardboard on each pallet to protect the bottom layer from dirt or damage. • A plastic sheet should also be provided when the pallet is wet.	• There should also be a sheet of cardboard between each pallet layer. This increases the stability when stacking the pallet.	• Stack the packings as closely together as possible. • The packings should not protrude from the sides of the pallet. • The packings must be of the same height per pallet layer. • Straight stacking reduces the risk of damaging the brochures. <i>As an alternative to loose stacking of the inserts, pallet boxes can also be used (e.g. box with bottom dimensions: 77 cm x 118 cm - 102 cm height).</i>

PROTECTION ON THE TOP OF EACH PALLET	PALLET WEIGHT: MAXIMUM 1,000 KG	PALLET HEIGHT: MAXIMUM 120 CM	IDENTIFICATION SHEETS	PACKAGING OF THE PALLET
				
• If the pallets are not stacked on top of each other, it is sufficient to protect the top of the pallet with a sheet of cardboard. • If the pallets will be stacked, the top must be protected with a wooden cover.	• One pallet may weigh a maximum of 1,000 kg. • A pallet that weighs more can no longer be manipulated using a pallet truck.	• If the pallet height exceeds 120 cm, there will be problems with manual removal, and the stability of the pallet will be endangered	• Apply to the short side and top of each pallet with the following data: • Name of the customer • Name and language of the respective edition • Name of the insert • Date of the insert • Total number of inserts on the pallet • Number of inserts per pack • Individual pallet number + total number of pallets of the edition • Weight of the pallet • Name (contact person), address and telephone number of the printer	• You provide the pallet with cardboard pallet corners, after which you wrap the pallet with stretch film OR you provide the pallet with a wooden cover board at the top, after which you strap the pallet with 4 plastic straps (2 per direction). PLEASE NOTE: no metal straps!

ATTENTION: Any additional work caused by incorrect packing or palletising of the delivered inserts will be invoiced at a rate of 50 €/hour per person.

ADVERTISEMENTS

RADIO

DELIVERY DEADLINE

Spot/message subject to prior production by us:

The constituent elements of the message (text to be translated, music, sound effects) must be received **4 working days** before the day of the first broadcast.

Material ready for broadcast:

2 working days before the day of the first broadcast of the message.

If produced by our technical services, the components should be sent to the following e-mail address:
luxwortadvertising@adsanddata.be

Choice of formats: mp3 (320 kbps), wav (44.1 kHz - 16 bit)

ATTENTION:

Material for **Radio Latina** are strongly recommended in Portuguese.

ELECTRONIC DELIVERY

The final message should be sent to: luxwortadvertising@adsanddata.be

PRODUCTION OF COMMERCIAL

Radio Latina also offers the **production of commercials**, carried out by our in-house production team. This service includes the translation and adaptation of your messages and/or spots from their original language into the languages used on Radio Latina: Portuguese, French, Cape Verdean Creole, Italian or Spanish.

Example: 30» spot

- Translation/adaptation of a text provided by the client
- Music provided by the client
- 1 Radio Latina voice
- Mp3 file sent to client by e-mail for review at a cost of € 315, broadcast time € 27

Possibility of creating sound jingles, sound effects, etc. (price on request).

Airing fee: 20 € per spot version

For further information on the production of spots:

Phone: (+352) 4993 9000

E-mail address: luxwortadvertising@adsanddata.be

EDITORIAL APPROACH

By its form, location and content, Advertiser content resembles and is strongly integrated into the editorial content of the medium that distributes it.

TO RESPECT

1 Define the objective

The content must have a specific objective: awareness, consideration, preference, loyalty, advocacy, but also propose a specific action to be carried out (subscribe to a newsletter, download an app, a white paper, etc.).

2 Respect the reading contract

To take advantage of the media brand's image, adapt the graphic codes and editorial style of the medium in order to make your speech chameleon-like.

3 Develop a long-term strategy

Like any branding strategy, Native Advertising strategy, Native Advertising needs to work on the long term with multiple touchpoints and diverse stories. Create a compelling saga.

4 Create effective content

Multiply the formats (interviews, infographics, testimonials, videos, etc.) to create an enriching reading experience.

5 Provide a good title

The title must appeal to the reader and encourage him or her to read on. It should be a promise that the content should develop. It should answer a generic question that anyone can ask themselves. You are the solution!

6 Dare to use an impactful visual

The visual should contribute to the story you want to tell. A good visual is worth a 1,000 words!

TO AVOID

1 Publish a classic advertisement

Avoid using your classic print or display advertisement to develop your voice.

2 Using a press release.

Resist the temptation to put your company name everywhere. Avoid commercial content. Do not use „I“ or „we“, content should remain neutral and not be the voice of the company.

3 Believe that it is a „One Shot“

Don't just focus on off events (anniversary, move, change of governance, company takeover, etc.) but on broader and, above all, differentiating issues.

4 False promises

Native advertising must be useful, honest and transparent.

5 Improvisation

Your content strategy needs time to think and production time. It requires a precise definition of objectives and real internal monitoring.

6 The ineffective

Avoid asking questions in the title. Don't just write about your product or service, but what it can do for you in a broader sense. Diversify topics and angles in order to avoid reader fatigue and optimise your referencing.
